

“According to the U.S. Department of Energy and the Building Owners and Managers Association (BOMA) energy savings of 5 to 30% can be realized through improved operations and maintenance of building systems..”

ENERGY STAR® (The Environmental Protection Agency)

“The top three end uses in the commercial sector are space heating, lighting, and space cooling, which represent close to half of commercial site energy consumption. .”

U.S. Environmental Protection Agency

Atlantic Westchester, Inc. – keeping your commercial space comfortable and efficient for over 50 years!

- ✓ **Maintenance and Repair:** Routine maintenance will extend equipment life and enhance system performance. We can cater our services to meet your facility's needs.
- ✓ **Installation:** Our team of professional technicians have numerous years of experience installing HVAC and building management systems and have the know-how to optimize your HVAC systems.
- ✓ **Retrofit/Upgrade:** We can help find the best equipment solutions to your mechanical needs and budget. Utility companies and government incentives/rebates can be combined with savings from higher efficiency equipment to maximize your ROI.
- ✓ **System Performance Analysis and Tuning:** Along with our comprehensive preventive maintenance plans, we can continually monitor your system's performance and provide necessary adjustment to ensure your equipment performs at its best - no matter what age it is.
