

Your members do not expect you to control the weather. Outdoor same day temperatures can fluctuate up to 24 degrees between dusk and dawn, and more than 36 degrees between today and tomorrow – and there is nothing we can do about it. Fortunately, your indoor weather *is* controllable.

With Atlantic Westchester servicing your facility's HVAC systems, you know what to forecast; better running, more reliable and extended equipment longevity allowing more dependable comfort. For added control and to predict increased energy savings, take advantage of our Building Management System and Energy Solution programs.

- ✓ **Maintenance and Repair:** Routine maintenance will extend equipment life and enhance system performance. We can cater our services to meet your facility's needs.
- ✓ **Installation:** Our team of professional technicians have numerous years of experience installing HVAC and building management systems and have the know-how to optimize your HVAC systems. We also offer industry leading design-build project capabilities.
- ✓ **Retrofit/Upgrade:** We can help find the best equipment solutions to your mechanical needs and budget. Utility companies and government incentives/rebates can be combined with savings from higher efficiency equipment to maximize your ROI.
- ✓ **System Performance Analysis and Tuning:** Along with our comprehensive preventive maintenance plans, we can continually monitor your system's performance and provide necessary adjustment to ensure your equipment performs at its best - no matter what age it is.
- ✓ **Building Management Systems and Energy Solutions:** There is no point owning HVAC equipment if it cannot be controlled properly. Atlantic Westchester can put you in control. Plus, as Con Edison Market Partners, we can personalize a plan to save you energy and money.
